Information Communication Technology (ICT)

WORK EXPERIENCE

Front- end Developer Intern

Jan 2025 - Present

CALLBOX. INC (Callbox Avescor Motors Building, Second, M.H. Molo, Iloilo City)

- Developed and optimized responsive web components, improving mobile usability across redesigned pages.
- Redesigned key website sections, including the "Industries We Serve" and eBook pages, enhancing user engagement and visual consistency.
- Implemented reusable front-end templates, making future page development more efficient.
- Practiced mobile-first design principles, ensuring compatibility and seamless experience across devices.
- Assisted in applying new templates and uploading content on WordPress.
- Applied basic SEO techniques to improve site structure and on-page optimization.

SKILLS

Web Development: HTML, CSS, SCSS, Tailwind, Bootstrap, Javascript, React

Database: Firebase, MySQL

CMS: Wordpress

Infrastructure & DevOps: Vercel, Git, Github

Design & Prototyping: Figma, Canva

PROJECTS

Callbox Ebooks page | 2025 (staging.callboxinc.com/wilmer-ebook-template/)

This Callbox Ebooks page was created during my on-the-job training at Callbox, where I built template layouts using SCSS, PHP, HTML, and CSS. Each card represents a design task from our supervisor, and I developed multiple layout options for the main Callbox website. I also practiced the mobile-first approach for responsiveness and gained experience in WordPress integration and frontend styling.

Trash Trade Admin Website | 2024 (wilmer27-ai.github.io/trashtradeAdmin/log-sign/index.html)

TrashTrade is an admin dashboard I developed for our thesis project, 'Gamified Proper Waste Disposal System using Image Recognition with Raspberry Pi and Mobile App Integration.' Built with JavaScript, Bootstrap, and Firebase, it manages users, transactions, and rewards in real-time using Firestore and Authentication.

X-HOTEL Management System | 2023 ([//bit.ly/44iCTbS](https://bit.ly/44iCTbS))

Developed a hotel management system using C# for backend, Firebase API integration, and Visual Studio for UI design.
